

DIST-O-METER

Measure distances Stay behind P

A physical measuring tool and web app
for distances to and between objects.

Built around a simple setup

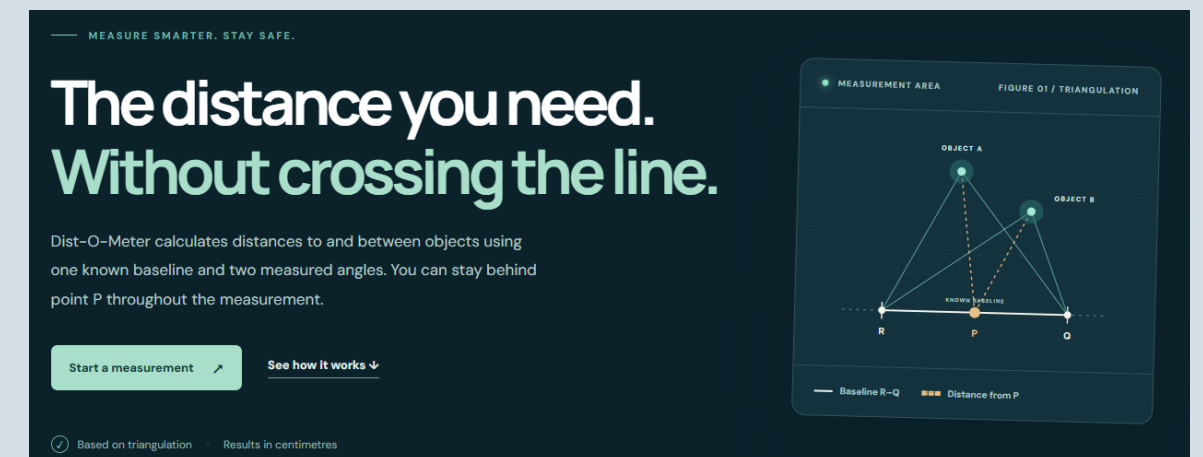

One known baseline

Two angles per object

Distances in centimetres

Physical prototype: baseline and angle stations

Web application

A complete measurement workflow

1 Enter baseline and angles

New measurement

All distances are shown in centimetres

Baseline R–Q

cm

e.g. 300

The known distance between the reference points.

Objects

Enter the angles from both endpoints.

3 objects

1

Object 1

Calculate distances

2 Read distances and coordinates

Distances from P

P → A

475.29 cm

P → B

357.95 cm

P → C

229.13 cm

Between objects

A → B

253.57 cm

A → C

327.27 cm

B → C

132.88 cm

Coordinates

A

(-22.79, 474.74)

B

(-202.09, 295.44)

C

(-150.00, 173.21)
